

Big-Screen Sports

The P12-ER Lighthouse screen features a 12.5-mm dot pitch and 5,000 nits of brightness. It includes Lighthouse's proven M4 technology, including 14-bit processing, uniformity control and full diagnostic feedback. It allows a stadium crowd to view the brightest colors possible, untarnished by the sunlight, time of day or viewing position. The P12-ER was installed recently at Newcastle stadium, home of the legendary Australian rugby league team, the Newcastle Knights. The high-resolution LED display will relay to fans spectacular, live images of their favorite players in action. They'll also see true-to-life images of instant replays, statistics, player interviews and ads.

Portable Scoring

Nevco Scoreboard Company offers the new UltraScore portable scoreboard. Lightweight (21 pounds) and battery-powered, UltraScore can be transported easily and set up at any event. At 3 feet wide by 2 feet tall, UltraScore is large enough to be seen clearly from 250 feet or more. It can be used for any game that requires a score, including soccer, football, baseball, softball, basketball, lacrosse and hockey. The carrying handle also functions as a hanger, allowing it to be hung from a fence. The long-life battery lasts for six hours or more on a single charge.

Nevco Scoreboard Company: 800-851-4040

Take a Seat in Style

Riverview Series benches fit public areas such as trails, parks, campgrounds, streetscapes, recreation centers, pools (indoor and out), and anywhere people are in need of comfortable seating with a touch of style. All Riverview benches incorporate armrests so they are more accessible. Choose surface-mount or embedded installations; fat, contour or double contour designs; powder-coated frames; plus five seat materials choices; many possible colors; and several lengths to create hundreds of possible variations to fit any design requirements. Using 3-foot or 4-foot modular components, you can build benches of any length you need.
