

Products Of Interest To Facilities !

All Aboard

All aboard for fun with the new Little Buddies Express Train where everyone travels first-class. Specifically designed for the little hands and feet of preschoolers, the train encourages safe play with larger openings and inside space for supervisors and parents to comfortably engage in pretend play alongside children. Offering versatility, the engine with a realistic "clanging" bell, tanker tunnel car, dining car and sandbox car are sold individually or together. The sturdy steel and plastic components are offered in bright color combinations of blue, yellow, white and red.

Save Water

Sloan's Flushmate® IV pressure-assist tank-type toilet was selected by BuildingGreen, Inc. as one of its Top 10 new green building products because of its environmental impact on saving water. The award recognizes the most innovative green building products added to the GreenSpec® Directory during 2004. A quiet-operation, one-gallon (four-liter) operating system for tank-type toilets, the Flushmate® IV uses 33 percent less water than conventional 1.6-gpf technologies. The Flushmate IV® system for High Efficient Toilets (HET) generates almost three times the flow rate of gravity units at 70 gallons per minute.

Cable Climber

Take your playground to the next level with the MaxClimb Keystone Cable Climber by Park Structures. The MaxClimb Keystone Cable Climber is a truly innovative combination of cable and sculpted plastic that is available as an attachment or as a freestanding item. The climber is challenging and fun for children, while allowing supervisors full visibility through the panels via its specific open handhold design. The component offers solid-surface vertical and lateral climbing, as well as cabling that creates a different experience with each step.
